Work experience

Intermediate Developer

Out of the Sandbox / November 2016 - Present
An award winning Shopify theme development company.

- Developed and maintained critical components of e-commerce themes, including shopping cart, quick view, and product pages.
- Reviewed code and mentored other developers.
- Translated design team's UX wireframes and mockups into responsive, interactive features, using HTML/CSS and JavaScript.

Web developer

Pointer creative / March 2016 to November 2016
A digital agency specializing in creating beautiful Shopify stores for brands such as Hypnotik and The New York Times.

- Developed pixel-perfect e-commerce stores from mock-ups in a fast and effective manner.
- Evaluated, troubleshooted and fixed bugs.
- Developed unique store features using HTML/CSS and JavaScript.

Designer

Bibnumbers.com / September 2015 - March 2016
A design and print company who produces custom racing bibs, bike plates and adhesive kits and other event ID products.

- Provided proposal layouts and designs under extremely tight deadlines
- Communicated effectively and professionally with race directors and printers.

Webmaster

- Problem solving

Senators Sports & Entertainment / July 2014 - September 2015
The corporation behind the Ottawa Senators NHL team. Dedicated to delivering memorable entertainment experiences.

- Provided web design, web development and web content management.
- Created HTML email templates and newsletters for email marketing campaigns.
- Worked with various stakeholders to ensure marketing content remained accurate and accessible.

Personal Projects

1Screen
HTML / SCSS / Liquid / JavaScript / Firebase
A web-based application for game masters which allows them to write, run and share Dungeons & Dragons campaigns. The app allows users to sign-up to the website so they can edit/run D&D campaigns and access them on any device.

LootJunkie
HTML / SCSS / Liquid / jQuery / JavaScript
A website that allows Overwatch fans to mimic the experience of opening loot boxes. Using item APIs, I have created a website that can maintain and update it's own item database. In 2017 LootJunkie was also featured in a PC Gamer article.
